

Abbeville Dec 17, 1837

Miss Weston,

It devolves on me to make return to you in response to your request for articles for your office. I am sorry we are no better prepared to contribute for your sale but such as we have we wish freely to give. Perhaps you have set to high a value on some of the articles, say the stockings, some of them cost the whole amount the others not quite, ~~then~~ on average we thought best to price at 30<sup>¢</sup>. The table mats I wish you would inform me whether they meet a ready sale & what they bring, (if it will not be to much trouble) We have delay'd sending forth this time, that all might have time to do what they could.

You will kind enclose in a wrapper in the smallest work box some money.

Your society will have the goodness to accept of this money & articles from the society in Abbeville.

The cause of abolition progress slowly in A. The death of brother Lovejoy has awakened some to action; but a lethargy seems to prevail here in consequence of the pressure of the times.

Remember me to your sister Chapman & believe me  
Yours for the slave  
Silva W. Jones
